Introduction to Information & Communication Technology – Lab

(CS 114)

Give your best to the project, try to work better in team. Following are the details for project along with the submission dates.

PROJECT DETAILS:

- Create a group of 4 to 5 students.
- Make a website using HTML and CSS that must follow the proper webpage format.
- It must have header, footer and navigation bar on every page.
- The website must have a sign up and sign in form.
- **DON'T USE ANY FRAMEWORK FOR CREATING WEBSITE**. Failing to do so will result in negative marking.
- You only have to create the front end User interface without any functionality embedded in it. But, if you are using JavaScript or any other language for implementing functionality, then it won't give you extra points (as the project is all about HTML and CSS). However, you are free to do it for your learning.
- Save all files (html and CSS), images and all supporting stuff in a folder named as your **website title**.
- Total weightage of the project is 15 marks (7 project implementation, 7 viva)
- Implementation would be graded in team and viva marks will be assigned individually.
- Check the viva Schedule with respect to your class schedule.

CLASS & SECTION	PROJECT SUBMISSION DATE	VIVA DATE
CS (section A)	3RD Feb ,2021	4th Feb,2021
CS (section B)	31st Jan,2021	1st Feb,2021
SE (Section A)	4th Feb,2021	5th Feb,2021
CS/SE (section D)	5th Feb,2021	6th Feb , 2021
